EXPERIENCE

PRIME INVESTORS PROTECTION ASSOCIATION AND LEAGUE (PRIME DATABASE GROUP) | Web Designer & Developer
Apr 2024 - Present | New Delhi, IN
- Contributed to the frontend development of a financial web application that displays real-time and historical data for NSE-listed companies, covering shares, bonds, mutual funds, investor holdings, and directors to support informed decision-making for investors and analysts.

SAANSH MEDIA | Web Developer
Dec 2022 - Feb 2024 | Remote
- Built frontend of a stock broking app using React.js with responsive pages, reusable components, and features like search, filter, and pagination.
- Developed interactive features including a date picker for tour bookings, a booking history page to track past bookings, and a reports page for generating insights on bookings and client feedback.

ICRTC, SRMIST | Web Developer
Aug 2021 - Nov 2022
- Worked as a web developer and team lead for ICRTC, handling website development, updates, reviews, and communication with authorities and professors.

PROJECTS

CAPITAL MARKET APPLICATIONS Apr 2024 – Present
HTML, CSS, React
- Developed interactive UI components like company overviews, stock data displays, bond tables, investor holdings, and director profiles for a financial web application.
- Built search, filtering, and reusable components (stock cards, financial tables, profiles) using React.js and Tailwind CSS to improve user experience and maintainability.
- Integrated responsive layouts and data visualization for financial metrics, corporate actions, and market sentiment, ensuring a smooth experience across all devices.

STOCK BROKING WEB APPLICATION Sep 2023 – Feb 2024
HTML, CSS, React
- Developed responsive UI pages including Login, Signup, Dashboard, Watchlist, and Portfolio Overview, and created reusable components like Stock Cards, and Modals.
- Implemented key features such as search, filter, sort, pagination, tabs, responsive design, along with designing loading spinners and notification toasts for better user experience.

TOUR & TRAVEL APPLICATION Dec 2022 - Aug 2023
HTML. CSS, React
- Built reusable components (Tour Cards, Client Info Form) and developed the booking flow for employees to book tours on behalf of corporate clients, including selection, summaries, and confirmations.
- Built interactive features like a date picker for tour bookings, a booking history page to track past bookings, and a reports page for generating insights on bookings and client feedback.
